- Label comprising at least one electronic component (2), characterised in that the electronic component (2) is cast in synthetic material (1).
 - 2. Label in accordance with Claim 1, characterised in that the label is self-adhesive.
- 10 3. Label in accordance with Claim 2, characterised in that the label is at least partially provided with adhesive (4) on at least one side.
- 4. Label in accordance with Claim 3, characterised in that the adhesive (4) is of low adherency.
 - 5. Label in accordance with at least one of the Claims 2 to 4, characterised in that the side of the label coated with adhesive is provided with a protective foil.
 - 6. Label in accordance with Claim 5, characterised in that the protective foil is siliconised.
- 7. Label in accordance with least one of the Claims 1 to 25 -6, characterised in that the label comprises at least one attachment means.
- Label in accordance with Claim 7, characterised in that
 the attachment means comprises at least one ribbon or at
 least one cord.
- 9. Label in accordance with at least one of the Claims 1 to

 6. characterised in that the label is in the form of a tag.
- 025 10. Label in accordance with at least one of the Claims 1 to

û fi

11. Label in accordance with at least one of the Claims 1 to 5, characterised in that the synthetic material (1) is coloured.

Duly D

 $C_{\rm eff} = 1.0$

12. Label in accordance with at least one of the Claims 1 to 11, characterised in that the synthetic material (1) comprises at least one polyurathane resin.

13. Label in accordance with Claim 12, characterised in that the polyurethane resin comprises the components, isocyanate and polyol.

15

W

14. Label in accordance with Claim 12 er 13, characterised in that the label is formed by flowing liquid polyurethane resin from a nozzle and by casting the electronic component (2) in the liquid polyurethane resin.

20

CSSCIPP ICCHOO

15. Label in accordance with Claim 14, characterised in that the flow and casting processes occur in the form of a drip process.

25 DA

16. Label in accordance with Claim 12 or 13, characterised in that the label is formed by casting the electronic component (2) in the liquid polygrethane resin in a mould.

17. Label in accordance with Claim 16, characterised in that the mould has a smoothed surface.

18. Label in accordance with Claim 16 ex 17, characterised in that the mould is polished.

35% 19. Label in accordance with at least one of the Claims 16
